***Response to Arguments***

1. Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.

2. With regards to claim 19, the applicant argued that claim 19 was dependent but in fact is independent and non-amended.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

4. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Epps, as set forth in the previous office action, in view of Zheng (US 6,611,522).

***Response to Arguments***

In re pg. 9, last five lines, the applicant argues Epps fails to disclose making decisions based on a cell-by-cell basis.

Art Unit: 3628

In response, Although Epps discloses using cells (see previous office action, e.g., cols. 39-40) and using ATM (col. 5, lines 20-34, especially lines 28-31; col. 41, lines 28-34), Epps fails to make it clear that IP variable length packets are or can be sent over fixed length ATM cells. Therefore, it can be argued that Epps fails to particularly call for the newly added limitation of cells of a uniform size, as specified in claims 1 and 11.

As shown in Figs. 7, 10, 18-19, Zheng clearly teaches that it is well known that IP variable length packets can be sent over fixed length ATM cells (Fig. 18; col. 2, lines 52-54), discarding cells (Fig. 19; col. 4, lines 13-59), and also that it is well known for a single device to route IP packets, and switch ATM cells and switch ATM over IP cells (col. 2, lines 47-65).

It would have been obvious for Epps to receive IP over ATM data and to discard based on the lower layer ATM cells because Epps clearly discloses using both ATM and MPLS (Epps: col. 5, lines 20-44), and Zheng teaches IP over ATM. Doing so would allow the source/customer to send IP data and have the ISP (Internet Service Provider) encapsulate the IP data into ATM cells in order to send the IP data over e.g., 155 Mbps ATM lines without forcing the customer to buy ATM equipment.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of

Art Unit: 3628

section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 19-20 are rejected under 35 U.S.C. 102(e) as being anticipate by Epps (US 6,721,316), as set forth in the previous office action.

#### ***Response to Arguments***

Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions. Applicant must also discuss the references applied against the claims, explaining how the claims avoid the references or distinguish from them.

#### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3628

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
